

MRA Cancer Registry Services

Cancer registries today are challenged with reporting timelines and a short supply of certified registrars.

Our Cancer Registry services help you collect, organize, and manage the data necessary to meet all reporting requirements, improving the quality of cancer care and protecting future revenue.

5 Ways MRA's Cancer Registry Services Deliver Higher Quality and Productivity:

Experience

All Coding Staff maintain AHIMA and/or AAPC certifications, depending on their area of specialty

Accuracy

Our staff meet or beat average productivity guidelines in all areas of coding with 95% or greater coding accuracy

Account Management

Dedicated account managers to fulfill your needs. They work with the client to ensure staffing levels can fluctuate to support any spikes in volume or employee absences

IT Secure

MRA conducts quarterly risk assessments; all Coding staff PCs are HIPAA compliant

Quarterly Business Reviews

Regular management meetings to review performance metrics and discuss modifications to services

Education

Yearly and quarterly coding update webinars providing AHIMA and/or AAPC CEUs

Customized Plan to Meet Your Registry Needs

Abstracting & Backlog Assistance

Registry Coordination & Management

Survey Preparation

Registrar Mentoring, Education & Training

Accreditation Assistance

Quality Assurance Auditing

Our registrars have a working knowledge of reporting standards for Commission on Cancer (CoC), State Reporting Facilities, North American Association for Central Cancer Registries (NAACCR), Central Registries and SEER, National Accreditation Program for Breast Centers (NAPBC)

"OUR HOSPITAL WAS ALMOST 4 YEARS BEHIND IN REPORTING CASES TO THE STATE. WE REACHED OUT TO MRA TO HELP US GET CAUGHT UP SO THAT WE COMPLIED WITH THE STATE. MRA WAS ABLE TO GET OUR HOSPITAL BACK INTO GOOD STANDING WITH THE STATE WITHIN 5 MONTHS. THIS WOULD HAVE NEVER BEEN POSSIBLE WITHOUT THEIR HELP."
